APTA Geriatrics Statement on Violence Against Asian/Asian-American and Pacific Islanders

Sadly, once again, a segment of the American population has been singled out for violence and hate crimes. The targeted individuals are our friends, our patients, our members. They are part of our APTA Geriatrics family. We know many of our Asian/Asian-American and Pacific Islander (AAPI) members may be managing fear and pain.

APTA Geriatrics condemns all acts of violence and bigotry. We are dedicated to supporting all our members toward providing the best care for their patients while working in a safe environment
